(Mol Ther Methods Clin Dev. 10, 128–143; September 21, 2018)

In the originally published version of this article, the description of the CHO-αHis cell line in the Materials and Methods section was not correct. The cell line was generated by transient transfection, not by lentiviral transduction. For details on the generation of the CHO-αHis cell line and cultivation, please refer to the corrected Materials and Methods section online.

In addition, there was a typo in Figure S2A, resulting in interchange of the framework residues at position 27 (K) and 28 (L) of the reference sequence. Figure S2A has been revised to correctly display a leucine at position 27 and a lysine at position 28.

The authors regret the errors.
